

Let's Go Circular!

A lesson on the circular economy from DS Smith

What are we going to talk about?

- Our finite, natural resources
- The take, make, dispose model
- The role of DS Smith in going circular
- Recycling and the circular economy

The environment is made up of natural resources...

We **take**
natural
resources

We **make** stuff
from those
resources

Then we
(mostly) **throw**
it away

This is called the '**linear economy**'

What is the
alternative to
**take, make,
dispose?**

**The Circular
Economy**

Recycling is
key in creating
the circular
economy

Game: What can be recycled?

Like the photos of
things that can be
recycled

Thank You
